LE BAISER DE L'HÔTEL DE VILLE, PARIS 1990

© ÉDITIONS DU DÉSASTRE

The importance of images

1. Images speak a thousand words!
2. Images used to have one main purpose only: making your website look good
3. Images now have a new purpose: improving your search engine results and directing visitors to your website. **But HOW?**

Images & search engines

Search engines cannot “view” pictures as such. They rely on text to understand what the image is about.

- File name
- Image “Alt” tag
- Text around the image
- Clues or tags
- The general nature of the web site

What kind of images should be
chosen?

WHICH IMAGES WILL HELP TO SELL MY PRODUCT?

Set the scene	Show your property in its current surroundings
Show the action:	Put a face to the picture and show people experiencing your product. These people must fit the look of your target market.
Evoke emotion:	Allow the clients to visualise themselves in the middle of the picture and feel as if they are experiencing your offerings.

Static, hard to relate to

Evokes action and emotion

"Nice view, but what can I do there?"

"It could be me and my mates on top of that glacier"

Photo credit: <http://flickr.com/photos/freewine/>

Photo credit: <http://flickr.com/photos/annamatic30>

Static, hard to relate to

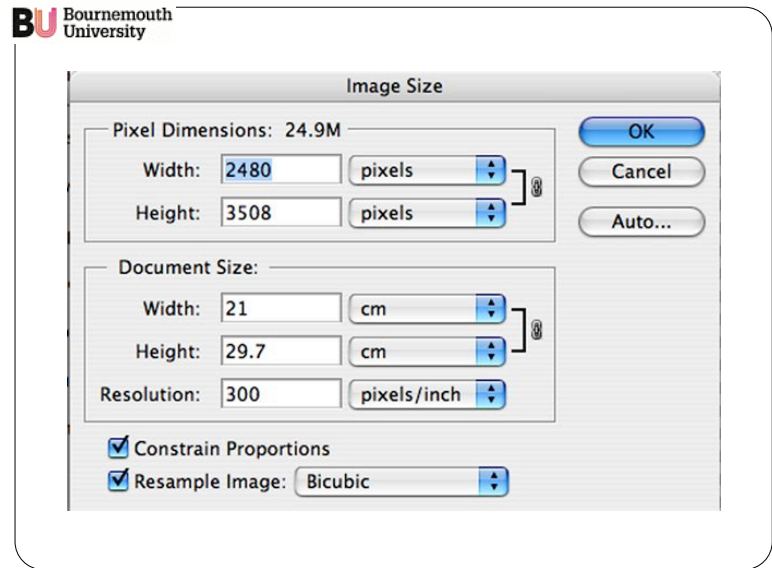

Evokes action and emotion

"I see, they have kayaks, but can I use them?"

"How much fun would my kids and I be having?"

Technical components of images

- Appropriate size (size of the standard monitor: 1024x768 pixels)
- Web-friendly resolution
- File type of either .jpg, .gif or .png
- Load fast (file size) size
